THE NEW SURGOL PRESENTERING. ARE devotorional exercises, Rev. Dr. Poor, from the standing committee on Sabbath Schools, presented an elaborate summary of work done during the past year. The committee on overtures called on the delegations from several freshylarics for records of the action of the Preshylarics on the proposed basis of reunitor. Communications from a number of Preshylarics were presented and referred. One was in relation to holding wessions without the presence of the uninister, and another asked that assessment for expenses of the General Assembly he reduced from eight to six oasts per member. overcome:

TRESCANCE.

The featest compositor in America, if not the world, Victor Looping, is at work in the Journal office. In four hours yesterday after room he set 5,500 cms solid brevier, and not a very good day for acting either. If he were to try a hittle, 3,000 and he world be about his average. When the new-fangled chesp type-setting machine, so much takked about, gets invented and set going, Loomis wants to arrange for a race. We never bet, but wouldn't mind going a new hat that he makes it "look sick."—[Lanyette Journal, 91st.

They have become the champions of universal negro suffrage, and upon that policy they must stand or fall. There is no policy upon which the truchearted Democracy of the country would rather meet them. In the great States of New York, Pennayivania, and Ohio, the fall battle is to be fought, and the yeadicts which the people of those States have hitherto given seem to reader the result of the coming elections a certainty. The Radicals will have to defend their leading measure before the people, a measure involving the rights of the States to regulate their own internal affairs and enact their own laws as against the right of Congress not only to change their laws but to annul certain portions of their constitutions, and, if the ded cattle over a year old are All the Southern States are represented ern States have eighty-six cotto change their aws but to annu ecrasin portions of their constitutions, and, if the people prove themselves incompetent to decide aright in such a ease, never more can we deem them competent to exercise with judgment and discretion the preroga-tives of free and independent citizens. No other test of delity to the public interests, no other criterion of genuine, devoted, and seli-sacrificing patriotism, no other standard of pure and unbounded devotion to the Contitution and the laws, is wanted than that a President should confer the best public offices upon the whole of his own household. At any time in the history of our country, until within the last four months, the tetterance of such sentiments by any man not absolutely insane would have been deemed an impossibility.

The Cincinnate ditor says that the examples of Washington and Jefferson are clied against President Grant's practice of nepotism, but he meers at Washington and Jefferson for setting such examples. This letter claims that this water is the selvent of calcul, so long and varily sought among the mineral springs of the Old World Anide from the selection and instruction themselves to this spring, it claims to supply a new medical agent of great and water levels of the selection of scientific men and invalids.

II. How to Produce Intense Cold. How to Produce Intense Cold.

By simply dissolving supho-cyanide of ammonium in water, Dr. Phijsson finds that an intense degree of cold can be produced. Chembste have known the fact that many salts—particularly those of ammonis—will very perceptibly lower the temperstring of water while dissolving; but Dr. Phijsson, has discovered this effect to be exincedinarily marked in the case of sulpho-cyanide of ammonia. In experimentally-four grains of this sait dissolving rapidly in twenty cubic inches of water, at 78 degrees Paluvinhett, caused the thermometer to sink his few seconds to 1s degrees Paluvinhett.

Among the other attractions announced for the grand musical peace featival at Boston next mouth are the overture to Auber's "Fra Diavolo," arranged for one thousand performers, and the anvil chorus from Verdis "Il Trovators," with a full band, grand chorus, one hundred savils, drum corps, artiflers, and bells. The effect of the place thus rendered will be very much like that of placing a pencil sketch under an immense magnifying lass. The little thin velo of molody which characterizes them will be completely spoiled by the immensity of the volume of so ind, and nothing but an unmusical noise will be the result.

The well managed clubs of London are fairly besieged by candidates for admission. In the Athensum, a literary club of great repatation, the number of ordinary members is limited to 1,200, and there are no fewer than 1,350 candidates on the books waiting for admission. The candidates have decided had waited twelve years; those last proposed will have to wait fafteen. In twelve or affacen years proposers and secondars forget their nominess, and the and ware themselves forgotten. The name of a candidate for ballot came on this year for ballot who had been dead for six years, but his proposer and secondar supposed him to have been his brother who was living, and, following their lead, twenty members signed his testimony, certifying him, "from personal acquaintance," to be an eligible cardidate, and he was elected.

Bleoming of a Censery Piant.

Bofanists are to be afforded a rare treat in the bleoming of the century piant at the Genesee Valley nurseries, pear Rochester, N. Y.

The theory that this plant flowers but once in a century is erroneous. It has been ascertained that the Rochester plant, now in possersion of the Messra. Frost, is but seventy years old. Other hataness are on record of the blossoming of these plants at less than a hundred years of age. One is mentioned in London's "Encyclopedia of Gaydenlog" that blossomed when less than twenty years old, having attained a height of twenty-seven icel, and bearing on its main stem 10,000 distinct flowers. Another flowered in Cornwall, England, when affly six years of age, having grown to a height of twenty-five feet. This plant bore 5,089 blossoms of an average length of five inches, which distilled large quantities of honey. But three or four entury plants are known to have blossomed in the Upited States.

Women possess the right to vote more extensively than is generally supposed. In Austria women can vote as nobles, in their corporate capacity as nnns, and as tax-payers. In sime cases, however, they vote by praxy. In Hungary, up to 1848, widows and single women who were landed proprietors possessed the right to vote. In Canada, as in several of our States, women are allowed to vote for and serve as exhol trustees. In the British Australian colony of Vistoria, women universally assumed the right to vote about four years ago, having found that the law had been so framed as to permit them. In Sweden, chiefly through the exertions of the shee Fredrika Bremer, an indirect right of voting was, in 1860, gramted to all vomen, possessing specified property qualifications. In Italy a widow, or wife separated from her husband, may vote if she pays taxes. Also in Hölland, singte women possessing property are ensitted to vote on all questions likely to affect its value. In many towns in France women possess and exercise the right to vote in municipal affairs.

The foregoing Protest, with the names thereto appended, was sent to a few of the clergy, with a request to know whether they would sign it, and whether they would approve a call for a meeting in Chicago, in June uext, of the Evangelical Cherry and Latiy of our Church, for the purpose of discussing topics connected with the Protest, and transacting such other business, as, under the circumstances, may then be deemed expedient.

Only five unfavorable replies have been received. The clergy whose names are bereunted annexed have bearily approved, the Protest, and expressed a wish for the meeting in June, and, so far as possible, have agreed to be present.

CHICAGO, Ill., April 18th, 1869.—DEAR SIR
—The many favorable replies to the note
which accompanded the "Frotest" lately issued in this city, and the deeply momentous
crisis which is upon us, warrant an early call
for a general meeting of the Evangelical Clery
and Laity of the Protestant Episcopal
Church, for the dehberste, temperate, and
thorough discussion of the vital questions
which are forced upon our consideration by
the situation and perils of our time-honored
and beloved commission.

That a firm, united and determined offort

It would be premature in this call to specify
what action ought to be taken by those to
whom their Protestant heritage is tinspeakably
precious, or to debate the questions that are
involved in this sharming crisis. Those, however, who magine that the best course is
